

Darjeeling Goodwill Animal Shelter

ANNUAL REPORT 2013 - 2014

Dear Supporters,

The Darjeeling Goodwill Animal Shelter Annual report is our opportunity to paint a picture of our work over last years for the needy animals of Kalimpong & Darjeeling. For your ease of understanding, we have split this report into the projects which DGAS embraces: Kalimpong Animal Shelter, Darjeeling Animal Shelter, and the Human Rescue Project. Each of these projects will present separate Annual Reports.

We are very grateful to all our supporters, donors and friends who have helped us during the last year.

We are especially thankful to Animaux Secours, France, One Voice and Animal protection Network for their regular help & support.

Thank you, Christine Townend Founder Trustee

DAS ANNUAL REPORT I APRIL 2013 TO 31 MARCH 2014

SO MUCH HAS HAPPENED ITS HARD TO KNOW WHERE TO START

Village Camps Helping Animals

Dr. Sameer Chhetri has compiled a list of the camps carried out this year. Many remote villages and tea gardens have been visited. They include Shanti Parvat, Singhamari, Tungsung, Rangbam Busty, Sukhiapokhari, Mungerjun Tea Estate, Dalli, Sungam Bazaar, and many others. Accurate records are kept of all animals treated, both at the Darjeeling Animal Shelter and during visits to smallholdings with animals such as pigs, goats, cattle and poultry. All in all, this financial year 1734 animals were brought to the shelter for treatment, 139 were treated by the mobile team, and 2388 treatments were given to animals which reside at the shelter, either for long or short periods, were treated.

Anti-rabies vaccination (ARV) was given to 938 dogs, and another 611 as part of the ABC programme. 33 cats were vaccinated, and another 26 as part of the cat ABC. Cows, goats, pigs and even a monkey, were vaccinated against rabies.

continued on page 2

Sameer with Cricket

DAS vet, Dr. Sameer Chhetri has an extraordinary rapport with animals. In this photo he is having a conversation with Cricket, a rescued street dog. but I have also watched Sameer calm a distressed cow as he tries to clean her hoof, and stroke a goat as she struggles to be free while he bandages her tail. It makes a lot of difference to have people working at the shelter who care about animals. Naren,

Saila, Rudra, Raju, Devika and Bidya are all gentle with the animals, and spend time talking to them. When there is an attitude of compassion towards the animals, it shows up also in the team work of the staff, who work happily together with many jokes. I am often amazed at how they understand each other's intentions when working together to catch a sick dog.

A nervous street dog is carried by Naran and Wangal in a sack so that it does not panic or bite

Back at the shelter the street dogs are unloaded from the vehicle in the garage (the gate of which is locked to prevent escape)

The dogs are led up to the ABC kennels on leads. They are given time to sniff their surroundings and settle down.

The work at DAS is full-on and successful

A Good Year for Rescues

80 animals were rescued during the year, fortunately none were surrendered, and 42 animals were re-homed. Possibly dogs are more in demand these days because there is less breeding on the streets due to the ABC programme.

The shelter vehicle travelled a distance of 31,627 kilometers, due to the isolation of many villages and tea estates at which treatment was

Dr. Julie Tolhurst operates on an ABC dog, assisted by Saila

222 animals were given 7 in 1 (a vaccine which includes protection against parvovirus and distemper two common illnesses among purebred dogs.

Altogether 3723 dogs were treated, 146 cats, and a number of other animals including pigs, poultry, goats and cattle.

given, and sterilisation was performed on dogs which had caring families to whom to return. The key hole flank spay which Dr. Sameer Chhetri performs is a very small incision in the right flank, through which the ovaries are removed, so the wound heals very quickly.

FROM THE EDITOR

I am proud of the hard work which the team at DAS carries out.
Because of this shelter, the street dogs which were in appalling condition, with scabby bare bodies, serious leg injuries, and often wounds where they had been hit by stones or kukuris (the Nepalese knife) are now looking plump and healthy, and have grown more friendly as the locals don't fear the dogs. The dogs are vaccinated against rabies, so cannot infect people with this disease.

Christine Townend.

REAL

Readers might remember the photo of Beau in our last Annual Report. He was found starving and with rickets. Treated by Dr. Julie Tolhurst, volunteer vet, and Dr. Sameer Chhetri, Beau is now a confident and friendly shelter dog.

KAS ANNUAL REPORT

I APRIL 2013 TO 31 MARCH 2014

Annual Report

During the year a total of 466 dogs were spayed, vaccinated and released and a total of 62 male dogs were castrated, vaccinated against rabies and released as part of the ABC programme. No animals were put to sleep due to the fact that the health of street dogs has greatly increased since the ABC programme started.

VACCINATIONS

A total of 2339 dogs were vaccinated against rabies and a total of 186 cats, 97 of these being part of the cat ABC programme. Altogether 97 cats were sterilised and returned to their owners, or to the street.

3501 animals were presented at the shelter for treatment. Of these 2108 were treated by the mobile team. Cattle, goats and pigs were also vaccinated, and treated by the mobile team.

190 animals were rescued, and 149 animals surrendered. Many of these were re-homed, and some of them are still living at the shelter (at any one time there are about 30 dogs and ten cats living in the shelter, some under treatment and some surrendered, and waiting for new homes). During the year 154 animals had to be euthanased because they were suffering excruciatin pain and had no chance of survival. Many of these were purebred pets particularly suseptible to parvo and distemper, both very cruel and often fatal diseases.

Working with the Government

Animal Week in Kalimpong is called Prani Sapta - and at this time the Central and State governments all over India provide help for animals.

Between 13-19 November, Dr Pandey was invited by the Block Livestock Development Officer (State vet Dept.) to participate in the camps, held each year at a different local village - this year Dalmanganv. There one such camp organised in each Block by the government vets.

Dr. Pandey spoke at
Dalmangany about the
importance of caring for farm
animals properly. 'It's not just
about getting as much meat, milk
and eggs as possible from the
animals in your care. Imagine
your life if you were kept in a
tiny room without the sun.' He
referred to the habit of cattle,
goats and pigs being
permanently tethered in small
bamboo sheds. (The reason for
this is that there is not much free
space.

DIFFICULT ROADS During the heavy monsoon parts of the road leading to the shelter are washed away, making travel difficult.

The pot-holed roads, a result of heavy rain, can take a heavy toll on vehicle brakes, tyres and engines.

MANY MEANS OF TRANSPORT Locals have become adept at adapting to the difficult road conditions and may use stretchers or head baskets to carry animals in need of treatemne to KAS

ABOUT ME

Name: Pooch

Age: 3 months

Prognosis: Promising

Problem: Rickets

Future: Someone has already visited the shelter and said they will adopt me as soon as the plaster comes off my front legs.

Why rickets: inadequate diet. I was starving. The KAS vet fed me calcium supplements

Thoughts: I'm so grateful that a kind boy found me in the gutter and brought me to the shelter. He will adopt me when I'm healthy again.

Padam helps out with surrendered pups

THESE PUPS WERE BROUGHT TO KALIMPONG ANIMAL SHELTER AND LEFT FOR STAFF TO CARE FOR. IT OFTEN HAPPENS THAT MEMBERS OF THE PUBLIC DO NOT WANT THE RESPONSIBILITY OF

RAISING PUPPIES. IN THIS CASE PADAM FED THE PUPS FIVE TIMES A DAY, KEPT THEM IN A KENNEL WHICH WAS ISOLATED FROM THE OTHER KENNELS.

FINALLY THERE WAS SOME GOOD NEWS. A NURSING MOTHER DOG WAS SURRENDERED TO THE SHELTER.

SHE WAS ONLY TOO HAPPY TO ADOPT THE PUPS AS HER OWN, WE DO NOT KNOW WHAT HAPPENED TO HER OWN PUPPIES .SHE LOVINGLY FED AND CARED FOR THEM.

PHOTO GALLERY

It was Mr. Donald Karthak who enabled the shelter to be built by selling KAS some of his land, situated in the beautiful area of Bong Busty ('Bong' is the Lepcha name for a type of bird, and 'busty' means a village or hamlet. Mr. Karthak is pictured here holding one of the puppies for whom a good home was found.

a group of cats lie outside the operating theatre after the spay operation. The incision is very small, and after the cat regains consciousness the owner carries her home in a plastic basket available from the market.

Before KAS began work, many of the dogs in Kalimpong suffered from bad mange, and terrible injuries, some of which were caused by road accidents, and others caused by people throwing stones to keep the dogs at a distance, or slashing them with the kukuri, a Nepalese knife. Now that people realise the dogs are safe and friendly they are not afraid of being approached by the dogs.

A collection of pups surrendered to KAS. Cared for by the staff, they grew, thrived and found good homes.
