

The **Weekly report** of Kalimpong Animal Shelter (KAS) is as follows:

The KAS team has carried out a rescue operation on a dog this Tuesday. The team was informed of a dog from Bidhyang, Kalimpong that the dog was creating trouble for some of the animals there esp. goats and deer around trespassing as the forest is very close by from his location at Bidyang. There was a complaint the dog had even attacked the deer there so the KAS team was asked to rescue the dog.

The team caught the dog and brought him to KAS.

Dogs from Siliguri and Sikkim, Malli were spayed on Monday and following that, the other dog was spayed on Wednesday. Owners continue bringing their dogs at KAS from neighbouring towns even though they are a little far. These owners said they preferred bringing their dogs to KAS and getting them checked by Dr. Deo Pandey than taking them to any other clinic for their check-up.

Date – 4th to 10th April, 2021

We are attending to animal outpatients on a daily basis whether it be for general health check-up, treatment, minor surgeries, emergency cases, spaying /neutering, etc.

Date – 4th to 10th April, 2021

Mr. Norden from Holumba had visited KAS on Wednesday to supervise the cattery project. He met Mahindra, Arpan and Dr. Deo and discussed about the interior of the cattery for the cats.

Date – 4th to 10th April, 2021

On Friday, an owned pet dog was brought to KAS for his check-up for not being able to walk properly. The dog was wobbling and limping all the more. Upon seeing the dog it was found that his dewclaw was ingrown that led to an injury and the toe pad was swelling making it difficult for the dog to move about. More to it, the wound had caused bacterial infection. Dr. Deo Pandey suggested dewclaw removal and dressing of the wound along with oral medicine.

.....Thank you.....
